Job Application for System Administrator

Dear Mr. Kennel,

I am applying for the Red Hat Network Satellite Server Administrator position. I've worked at Los Alamos National Laboratory for the past 2 summers and I discovered this posting through a coworker there.

I'm interested in this position because I already have experience in working with Red Hat Satellite both working at Los Alamos National Laboratory and work for Michigan Tech IT. I'm interested in working full time at Los Alamos after working there during the summers have shown me how great of a place it is to work. I'm a qualified application for this position since I have significant experience working with and administering Satellite servers for other organizations. I also currently hold an active Q clearance that this job requires. I have included my resume for you to look over.

I would love the opportunity to interview with you for this position. I am available via phone (616) 617-2649 or you may send me an email at zrjones12@gmail.com. I look forward to speaking with you.

Sincerely,

Zachary Jones
